

Defzone 1650mg

The Defzone 1650mg is a Firewall Mail and UTM gateway suitable for professional SMB to enterprise with 1 to 1000 recommended users.

Because of the Mail and UTM functionality you are also protected for other threats like viruses, spam and trojans that are blocked for you on the Defzone 1650mg appliance.

This connectivity appliance has advanced router functions so you can built very complex situations with the Defzone 1650mg and be in control of your network and your extended network through VPN tunnels.

A real-time network view 'the Netzone' and configuration printout will help you to survey complex network environments.

Because of the use of power saving chips and SSD (Solid State Drive) we use less energy and produce less heat that improves the reliability of our appliances and saves your data center cost for climate control and energy.
